

# REACH-B Study

REal World Assessment of people living with Chronic Hepatitis B in Australia

This clinic is participating in the REACH-B study.

The study is collecting information on people living with hepatitis B to understand what care and treatment they are receiving and whether this can be improved.

REACH-B is taking place at other clinics around Australia.

Participation in this study is confidential.

If you do not wish your information to be included in this study, please notify the clinic staff, using the following contact details.
